

Faculty of Oral & Dental Medicine

Oral Histology

Information :

Course Code : HPT 221

Level : Undergraduate

Course Hours : 3.00- Hours

Department : Faculty of Oral & Dental Medicine

Instructor Information :

Title	Name	Office hours
Professor	AMANY AHMED RABEE MOHAMED OSMAN	6
Professor	Mona Fathy Abdel Maksoud Eldeeb	12
Associate Professor	Radwa Taher Mostafa Mohamed Elsharkawy	7
Associate Professor	RANEEM FAROUK MOHAMED ADEEB OBEID	4
Lecturer	Nehad Mostafa Abd El Monsif Mostafa	5
Assistant Lecturer	Esraa Gamal Hassan Mohamed	2
Assistant Lecturer	Yasmine Mohamed Hasan Elghazawy	4
Assistant Lecturer	Aya Mohamed Reyad Ismaeil AbuHussein	2

Area Of Study :

- To keep pace with recent advances in oral biology.
- To provide an expanded knowledge about histology, embryology and physiology of oral and dental tissues.
- To serve as a basis for understanding the clinical courses such as oral pathology, oral surgery and oral medicine etc.
- To enable the development and application of appropriate professional attitude as well as communication and practical skills of the students.

Description :

tooth development (bud stage, cap stage, bell stage, appositional stage.)
Enamel, dentin, cementum and pulp
longitudinal and transverse section of enamel, dentin, cementum.)
decalcified section of the pulp

Course outcomes :

a. Knowledge and Understanding: :

1 -	Define the different oral and para oral structures..
2 -	Describe embryology of oral and para oral tissues.
3 -	Identify and draw both hard and soft oral tissues..
4 -	Describe the structure and the function of different oral and para oral tissues.
5 -	Differentiate between different hard dental and soft oral tissues
6 -	Explain the clinical significance associated with certain oral and para oral structures.

7 -	Describe the histological age changes of oral and para oral tissues..
b.Intellectual Skills: :	
1 -	Differentiate between the different oral and para oral tissues..
2 -	Distinguish any abnormalities that might affect the normal oral and para oral tissues.
c.Professional and Practical Skills: :	
1 -	Use the light microscope properly.
2 -	Identify the different oral tissues using the light microscope.
3 -	Draw the histological structure of oral and para oral tissues.
4 -	Understand the technical steps for preparation of tooth ground and decalcified microscopic sections as well as the main histological and histochemical stains..
d.General and Transferable Skills: :	
1 -	Communicate effectively with colleagues , staff members and helping personnel.
2 -	Demonstrate appropriate professional attitude
3 -	Behavior in different situations

Course Topic And Contents :			
Topic	No. of hours	Lecture	Tutorial / Practical
Tooth development	15		
Enamel	12		
Dentin	11		
Cementum	8		
Pulp	8		
Shedding	4		
Eruption	6		

Teaching And Learning Methodologies :
Lectures.
Practical
Small group sessions
Student draw in their practical books under supervision of the responsible staff members and helping personnel in small subgroups

Course Assessment :			
Methods of assessment	Relative weight %	Week No	Assess What
1st Mid-term Examination	15.00		assess knowledge and understanding
2nd Mid-term Examination	15.00		assess knowledge and understanding
Final written Examination	25.00		
Oral Examination	10.00		knowledge and understanding and attitude
Practical Examination	15.00		assess practical skills & intellectual skills & general skills

Course Notes :

- ~ All lectures are available for students from the faculty as a soft copy.
- ~ Textbooks : Mary Bath-Balogh, Margaret J. Fehrenbach, Dental Embryology Histology and anatomy 2th Edition ,2006
- ~ Websites related to the studysubject
- ~ Overhead projectors, slides and computer presentations used during teaching
