

## Faculty of Engineering & Technology

**Transformations & Complex Analysis** 

Information :						
Course Code :	EMP214	Level	•	Undergraduate	Course Hours :	3.00- Hours
Department : Mechatronics Engineering						
Description :						

Trigonometric series; Fourier series, integrals and transforms; Taylor and Laurent theories; Cauchy integral theorem; Singularity and residue theorem; Convolution and Laplace transform; Inverse Laplace transform methods; Conformal mapping; Fundamentals of z transform; Inverse z-transform methods; Difference equation and solution using z-transform technique; Applications using MATLAB.
