Description :

This course develops the ability of students to integrate, analyze and interpret simulated patients medication records information in respect to specific clinical condition. In addition, the student can develop rational drug therapy and pharmacotherapeutic care plans to provide safe and effective therapeutic monitoring and management of the diseases concerning neurological, psychiatric, endocrinological, renal, arthritic, and infectious disorders. The role of EBM in making therapeutic decisions is emphasized so that the student can design plans for monitoring the clinical response and toxicity of the pharmacotherapeutics the patient was or is on. In practical sessions, students will develop skills in pharmacy practice and patient counseling.
