

Faculty of Engineering & Technology

Signals & Systems

Information :

Course Code : EED230

Level : Undergraduate

Course Hours : 3.00- Hours

Department : Communication and Computer Engineering

Description :

Continuous-time and discrete-time signals and systems. Linear time-invariant (LTI) systems: system properties, convolution sum and the convolution integral representation, system properties, LTI systems described by differential and difference equations. Fourier series: Representation of periodic continuous-time signals. Continuous time Fourier transform and its properties: Time and frequency shifting, conjugation, differentiation and integration, scaling, convolution, and the Parseval's relation. Case studies using S/W tools (e.g. MATLAB).
