

Faculty of Economics and Political Science

Political Psychology

Information :

Course Code : PSC 311

Level : Undergraduate

Course Hours : 3.00- Hours

Department : Department of Political Science

Area Of Study :

This course is interdisciplinary that employs social and cognitive psychological theories and readings in order to understand the dimensions of the world of political practice. It is concerned with the role of human thought, emotion and behavior in politics and the linkages between economics, political science and political mass media. This is done through studying the psychological origins of citizens' political beliefs and actions from a variety of perspectives. Topics covered include: information processing, inter-group conflict, attribution, tolerance, stereotyping, prejudice, revolting, the strength versus weakness of the state-people political psychology construct as well as political psychology of leaders/heads of states and activists.

Course Goals:

- Provide an introduction to the study of political psychology, which is intended to broaden the understanding of politics, and leader- politics and people-politics in particular;
- Enable a development of analytical, discussion and research skills in the field of political psychology;
- Comprehend various psychological schools and how they analyze human political behavior, and point out their validity or lack of;
- Draw on both class material and outside knowledge; application and theory.

Description :

This course is interdisciplinary that employs social and cognitive psychological theories and readings in order to understand the dimensions of the world of political practice. It is concerned with the role of human thought, emotion and behavior in politics and the linkages between economics, political science and political mass media. This is done through studying the psychological origins of citizens' political beliefs and actions from a variety of perspectives. Topics covered include: information processing, inter-group conflict, attribution, tolerance, stereotyping, prejudice, revolting, the strength versus weakness of the state-people political psychology construct as well as political psychology of leaders/heads of states and activists.
