

Faculty of Oral & Dental Medicine

Zoology

Information:

Course Code: SGS 141 Level: Undergraduate Course Hours: 3.00- Hours

Department: Faculty of Oral & Dental Medicine

Instructor Information:

Title	Name	Office hours
Lecturer	Dina Magdy Abdel Salam Abdel Aziz	

Area Of Study:

"Ao relate different body organs to each other anatomically and the use of the proper terms to describe their position.

Description:

microscopy (the light and electron), the animal cell and the cell membrane, membranous components, embryology, connective tissue, buccopharengeal cavity, general viscera, venus system of toad, urinogenital system in (male & female) of toad

Course outcomes :

a.Knowledge and Understanding: :

- 1 To relate the function of cell organelles to the ultra structure.
- 2 To describe the main steps during early embryonic development in
- 3 To relate different body organs to each other anatomically and the
- 4 To memorize the basic scientific terminology regarding anatomical
- 5 To estimate the possible abnormalities resulted from lesions in

b.Intellectual Skills: :

- 1 To define different types of tissues
- 2 To name the sites of occurrence of each tissue in the body organs
- 3 To explain the relation between the anatomical site of the tissue and its function
- 4 To name the main functions of cell organelles

c.Professional and Practical Skills: :

- 1 To examine the parts of the bones and to recognize types of articulations
- 2 To examine and recognize section in body organs microscopically
- 3 To illustrate diagrams for different sections in body organs
- 4 To use the dissecting instruments and light microscope

[&]quot;ÁTo name the main functions of cell organelles

[˝]Áo be able to perform microscopic examination and identification of histological studies

5 - Microscopic examination and identification of histological studies

d.General and Transferable Skills::

- 1 Recognize of the value and role of lifelong learning, self-assessment and critical thinking in maintaining competency
- 2 Evaluate personal progress and be able to assess ones weakness and strengths

Course Topic And Contents :			
Topic	No. of hours	Lecture	Tutorial / Practical
Introduction	3		
The animal cell and the cell membrane	3		
Membranous components	3		
Membranous and non-membranous components.	3		
The cytoplasmic matrix	3		
The Nucleus	3		
Introduction to immunology	3		
Immunology	3		
Embryology	3		
Epithelial tissue 1	3		
Epithelial tissue 2	3		
Connective tissue	3		

Teaching And Learning Methodologies:

Lectures

Clinical training

Demonstrations

Role playing and hands on

Small group discussion

Course Assessment :				
Methods of assessment	Relative weight %	Week No	Assess What	
1st Mid Term Exam	20.00			
2nd Mid Term Exam	20.00			
class work	20.00			
Final Written Examination	30.00			
Practical Examination	10.00			

Course Notes:

Department Books available for all students. all biological books
