Faculty of Economics and Political Science

Introduction to Statistics

Information :

Course Code :	STS 101	**Level :**	Undergraduate	**Course Hours :**	3.00- Hours

Department : Faculty of Economics and Political Science

Instructor Information :

Title	Name	Office hours
Associate Professor	Mahmoud Mostafa Rashwan Abd Elnaser	3
Teaching Assistant	Mennatallah Mohamed Hassan Mahmoud Mohamed Elgamal	

Area Of Study :

This course presents the basic statistical ideas that are used in different social science disciplines. The course covers various statistical instruments such as: calculating the measures of central tendency (mean- median- mode- variance- standard deviation), providing the students with different graphical illustrations (histogram- bar charts- pie charts- stem and leaf-line and scatter plot), analyzing data and its distribution (discrete distribution-continuous distribution), as well as covering structures and methods of probability distributions. The course also familiarizes students with the use of statistical software program.

Course Goals:
ÅPrepare students with a deeper insight on the possible sub-fields in economics, political science, public administration and mass media.
ÅOrganize analyses, interpret and summarize the data in a useful and informative manner.
ÅDistinguish between different kinds of data and how they can describe the data in several behaviors.

Description :

This course presents the basic statistical ideas that are used in different social science disciplines. The course covers various statistical instruments such as: calculating the measures of central tendency (mean- median- mode- variance- standard deviation), providing the students with different graphical illustrations (histogram- bar charts- pie charts- stem and leaf-line and scatter plot), analyzing data and its distribution (discrete distribution-continuous distribution), as well as covering structures and methods of probability distributions. The course also familiarizes students with the use of statistical software program.

Course outcomes :

a.Knowledge and Understanding: :	
1 -	1.3) Differentiate between descriptive and inferential statistics
2 -	1.2) Comprehend frequency distributions and different graphical techniques.
3 -	1.1) Understand data types, how data should be sampled, tabulated and graphed.
b.Intellectual Skills: :	
1 -	3.3) Analyze data using graphs Construct a frequency distribution, histogram, pie chart and a scatter plot.
2 -	3.2) Compare and examine observational studies.

3 -	3.1) Analyze problems and design problem solving techniques.
c.Professional and Practical Skills: :	
1 -	2.5) Experiment probability theory and rules.
2 -	2.4) Distinguish between discrete distribution and continuous distribution.
3 -	2.3) Compute the mean, median, mode, percentile, quartile, range and variance on grouped and ungrouped data.
4 -	2.2) Select the appropriate law of probability to use in solving problems.
5 -	2.1) Select the right sample, distinguishing between random and nonrandom sampling.
d.General and Transferable Skills: :	
1 -	4.2) Abstract reasoning, methodological knowledge and technical know-how.
2 -	4.1) Enhance critical thinking and innovation.

Course Topic And Contents :

Topic	No. of hours	Lecture	Tutorial / Practical
Introductory Lecture and Course Outline	5	1	1
Data Collection ÅMethods of Collecting Data ÅDescriptive vs. Inferential Statistics	5	1	1
Population, Sample and Sampling Techniques	5	1	1
Data Description: Charts and graphical representation ÅFrequency Distribution ÅHistograms ÅBar Chart- Pie chart- Stem and Leaf Diagram ÅScatter Plot and Line Chart	10	2	2
Midterm Exam		1	
Measuring of Center and Location: ÅPopulation Mean and Sample Mean ÅMedian ÅMode ÅWeighted Mean ÅPercentiles and Quartiles	10	2	2
Measurements of Variation: ÅRange ÅInterquartile range ÅPopulation Variance and Standard Deviation ÅSample Variance and Standard Deviation ÅCoefficient of Variation	15	3	3
Introduction to Probability: ÅProbability Rules	15	3	3
Final Exam		1	

Teaching And Learning Methodologies :
Presentation
Group discussion
Research Paper

Course Assessment :

Methods of assessment	Relative weight %	Week No	Assess What
Course Work (Attendance, Participation, Assignments, Quizzes, Research Paperé)	30.00		To assess theoretical background of the intellectual and practical skills
Final Exam	40.00	15	To assess knowledge and intellectual skills
Midterm Exam	30.00	6	To assess professional skills
